Visibility of accidents/catastrophes

China proved most visible for accidents/catastrophes after an explosion in Tianjin resulted in the deaths of more than 100 people. Lax safety procedures and human oversight have been blamed for the blasts, causing Chinese industry to come under fire for poor safety standards.

Basis: 356 reports on accidents/catastrophes out of a total of 22,208 on 27 global TV news programs (excluding domestic coverage).
